

Zelie Yarwood

Chief Technology Officer | Westbrook | zelie.yarwood@example.com

PROFESSIONAL SUMMARY

Brings a steady work ethic, curiosity and a willingness to take on new responsibilities. Dependable professional with a collaborative attitude and a genuine interest in continuous learning. Adapts well to new tools and processes and enjoys sharing knowledge with others. Known among colleagues for clear communication and a calm, organised approach to everyday work.

CORE SKILLS

technology strategy, cloud architecture, engineering leadership, security and compliance, platform scalability, budget ownership, hiring and team building, vendor negotiation, data platforms, board reporting, incident management, product partnership.

PROFESSIONAL EXPERIENCE

Chief Technology Officer — Bluepeak Systems (2023 – Present)

- Maintained engineering hiring and career frameworks for both internal teams and external partners.
- Assisted with engineering budgets and headcount planning and kept relevant documentation up to date for the wider team.
- Took part in engineering budgets and headcount planning and kept relevant documentation up to date for the wider team.
- Launched a company-wide data platform, increasing deployment frequency by 60%.
- Delivered a company-wide data platform, increasing platform availability by 14%.
- Took part in the long-term technology roadmap using the tools and processes already in place within the organisation.
- Contributed to security and compliance programmes in line with the priorities agreed with senior stakeholders.
- Rolled out an internal developer platform, reducing infrastructure costs by 35% within 3 months.
- Delivered a microservices architecture, growing deployment frequency by 41% year on year.
- Implemented a company-wide data platform that saved \$1230K per year.
- Collaborated on the long-term technology roadmap on a day-to-day basis alongside other routine responsibilities.
- Redesigned a disaster recovery strategy now used by 8,130 customers.
- Overhauled an engineering career ladder that saved \$1290K per year.
- Introduced a microservices architecture, growing deployment frequency by 42% year on year.
- Prepared relationships with key technology vendors with attention to accuracy, clarity and consistency.
- Monitored incident response and postmortem practices on a day-to-day basis alongside other routine responsibilities.
- Contributed to engineering budgets and headcount planning while following established internal guidelines and quality standards.
- Maintained architecture reviews for major initiatives during periods of change and shifting business priorities.
- Supported incident response and postmortem practices for both internal teams and external partners.
- Prepared security and compliance programmes in close collaboration with colleagues across several departments.
- Documented relationships with key technology vendors and kept relevant documentation up to date for the wider team.
- Monitored the long-term technology roadmap in close collaboration with colleagues across several departments.
- Handled quarterly technology updates for the board for both internal teams and external partners.

- Handled the long-term technology roadmap and kept relevant documentation up to date for the wider team.
- Supported the platform and infrastructure organisation for both internal teams and external partners.
- Reviewed incident response and postmortem practices during periods of change and shifting business priorities.
- Restructured a machine learning recommendation service, growing platform availability by 38% year on year.
- Redesigned an engineering career ladder within 5 months, generating \$885K in new revenue.
- Spearheaded a microservices architecture now used by 7,980 users.
- Documented security and compliance programmes for both internal teams and external partners.
- Restructured an engineering career ladder, increasing platform availability by 31%.
- Prepared technical due diligence for partnerships during periods of change and shifting business priorities.
- Built an internal developer platform, cutting infrastructure costs from 16 to 8 days.
- Monitored architecture reviews for major initiatives using the tools and processes already in place within the organisation.
- Delivered a machine learning recommendation service that saved \$510K per year.
- Spearheaded an internal developer platform, increasing engineering retention by 15%.
- Assisted with security and compliance programmes on a day-to-day basis alongside other routine responsibilities.
- Collaborated on engineering budgets and headcount planning during periods of change and shifting business priorities.
- Received the Regional Leadership Award for delivering a company-wide data platform.
- Supported relationships with key technology vendors on a day-to-day basis alongside other routine responsibilities.
- Overhauled a zero-trust security programme, growing engineering retention by 21% year on year.
- Received the Regional Leadership Award for delivering an internal developer platform.

VP of Engineering — Saltmarsh Consulting (2018 – 2023)

- Led a team of 15 to deliver an engineering career ladder 4 weeks ahead of schedule.
- Handled architecture reviews for major initiatives during periods of change and shifting business priorities.
- Took part in relationships with key technology vendors in close collaboration with colleagues across several departments.
- Helped coordinate engineering hiring and career frameworks in close collaboration with colleagues across several departments.
- Received the Regional Leadership Award for delivering an internal developer platform.
- Organised incident response and postmortem practices in line with the priorities agreed with senior stakeholders.
- Overhauled a machine learning recommendation service within 9 months, generating \$1140K in new revenue.
- Redesigned a machine learning recommendation service within 8 months, generating \$675K in new revenue.
- Maintained incident response and postmortem practices as part of a small and friendly cross-functional team.
- Organised the platform and infrastructure organisation with attention to accuracy, clarity and consistency.
- Launched a company-wide data platform, cutting incident resolution time from 23 to 3 days.
- Helped coordinate technical due diligence for partnerships during periods of change and shifting business priorities.
- Looked after security and compliance programmes with attention to accuracy, clarity and consistency.
- Collaborated on the platform and infrastructure organisation as part of a small and friendly cross-functional team.

- Contributed to the long-term technology roadmap during periods of change and shifting business priorities.
- Rolled out a disaster recovery strategy, cutting security vulnerabilities from 11 to 9 days.
- Streamlined a cloud migration of the core platform, cutting time to market from 25 to 2 days.
- Documented the long-term technology roadmap for both internal teams and external partners.
- Assisted with incident response and postmortem practices while following established internal guidelines and quality standards.
- Reviewed the long-term technology roadmap while following established internal guidelines and quality standards.
- Introduced an engineering career ladder, reducing incident resolution time by 59% within 6 months.
- Contributed to technical due diligence for partnerships for both internal teams and external partners.
- Contributed to relationships with key technology vendors in line with the priorities agreed with senior stakeholders.
- Supported security and compliance programmes and kept relevant documentation up to date for the wider team.
- Received the Team of the Year Award for delivering an engineering career ladder.
- Collaborated on the platform and infrastructure organisation and kept relevant documentation up to date for the wider team.
- Contributed to technical due diligence for partnerships on a day-to-day basis alongside other routine responsibilities.
- Took part in security and compliance programmes during periods of change and shifting business priorities.
- Documented relationships with key technology vendors using the tools and processes already in place within the organisation.
- Documented the long-term technology roadmap using the tools and processes already in place within the organisation.
- Collaborated on the long-term technology roadmap and kept relevant documentation up to date for the wider team.
- Collaborated on security and compliance programmes during periods of change and shifting business priorities.
- Received the Excellence Award for delivering a machine learning recommendation service.
- Contributed to the platform and infrastructure organisation during periods of change and shifting business priorities.
- Automated a company-wide data platform, cutting infrastructure costs from 23 to 5 days.

Head of Platform Engineering — Corvid Analytics (2013 – 2018)

- Supported incident response and postmortem practices during periods of change and shifting business priorities.
- Handled incident response and postmortem practices using the tools and processes already in place within the organisation.
- Supported engineering budgets and headcount planning using the tools and processes already in place within the organisation.
- Maintained engineering hiring and career frameworks on a day-to-day basis alongside other routine responsibilities.
- Prepared the platform and infrastructure organisation on a day-to-day basis alongside other routine responsibilities.
- Restructured a cloud migration of the core platform that saved \$765K per year.
- Built a machine learning recommendation service, increasing engineering retention by 9%.
- Reviewed engineering budgets and headcount planning during periods of change and shifting business priorities.
- Documented technical due diligence for partnerships using the tools and processes already in place within the organisation.
- Introduced an engineering career ladder within 5 months, generating \$420K in new revenue.

- Reviewed architecture reviews for major initiatives as part of a small and friendly cross-functional team.
- Launched a company-wide data platform, growing deployment frequency by 16% year on year.
- Launched a cloud migration of the core platform, cutting incident resolution time from 17 to 4 days.
- Contributed to architecture reviews for major initiatives for both internal teams and external partners.
- Collaborated on relationships with key technology vendors in line with the priorities agreed with senior stakeholders.
- Spearheaded a microservices architecture that saved \$615K per year.
- Built an internal developer platform within 4 months, generating \$1080K in new revenue.
- Documented the long-term technology roadmap and kept relevant documentation up to date for the wider team.
- Documented quarterly technology updates for the board while following established internal guidelines and quality standards.
- Assisted with quarterly technology updates for the board while following established internal guidelines and quality standards.
- Assisted with the platform and infrastructure organisation with attention to accuracy, clarity and consistency.
- Looked after technical due diligence for partnerships during periods of change and shifting business priorities.
- Implemented a machine learning recommendation service that saved \$390K per year.
- Prepared engineering budgets and headcount planning and kept relevant documentation up to date for the wider team.
- Maintained security and compliance programmes for both internal teams and external partners.
- Built an internal developer platform, cutting infrastructure costs from 24 to 9 days.
- Organised the platform and infrastructure organisation as part of a small and friendly cross-functional team.
- Prepared the long-term technology roadmap and kept relevant documentation up to date for the wider team.
- Restructured a cloud migration of the core platform that saved \$660K per year.
- Prepared engineering budgets and headcount planning while following established internal guidelines and quality standards.
- Received the Excellence Award for delivering a cloud migration of the core platform.
- Automated a machine learning recommendation service, increasing engineering retention by 35%.
- Helped coordinate security and compliance programmes as part of a small and friendly cross-functional team.
- Assisted with incident response and postmortem practices during periods of change and shifting business priorities.
- Took part in technical due diligence for partnerships while following established internal guidelines and quality standards.

Engineering Manager — Ironbridge Logistics (2009 – 2013)

- Prepared the long-term technology roadmap in close collaboration with colleagues across several departments.
- Organised architecture reviews for major initiatives using the tools and processes already in place within the organisation.
- Delivered a company-wide data platform, cutting security vulnerabilities from 29 to 6 days.
- Reviewed engineering budgets and headcount planning for both internal teams and external partners.
- Took part in engineering budgets and headcount planning with attention to accuracy, clarity and consistency.
- Collaborated on security and compliance programmes in line with the priorities agreed with senior stakeholders.
- Collaborated on quarterly technology updates for the board on a day-to-day basis alongside other routine responsibilities.
- Contributed to relationships with key technology vendors for both internal teams and external partners.

- Maintained incident response and postmortem practices during periods of change and shifting business priorities.
- Maintained architecture reviews for major initiatives using the tools and processes already in place within the organisation.
- Collaborated on technical due diligence for partnerships with attention to accuracy, clarity and consistency.
- Looked after architecture reviews for major initiatives with attention to accuracy, clarity and consistency.
- Organised engineering hiring and career frameworks with attention to accuracy, clarity and consistency.
- Helped coordinate engineering budgets and headcount planning in close collaboration with colleagues across several departments.
- Organised quarterly technology updates for the board as part of a small and friendly cross-functional team.
- Supported incident response and postmortem practices on a day-to-day basis alongside other routine responsibilities.
- Prepared incident response and postmortem practices using the tools and processes already in place within the organisation.
- Received the Regional Leadership Award for delivering a microservices architecture.
- Supported quarterly technology updates for the board while following established internal guidelines and quality standards.
- Supported incident response and postmortem practices and kept relevant documentation up to date for the wider team.
- Maintained architecture reviews for major initiatives for both internal teams and external partners.
- Implemented a machine learning recommendation service, growing engineering retention by 18% year on year.
- Handled architecture reviews for major initiatives on a day-to-day basis alongside other routine responsibilities.
- Looked after engineering budgets and headcount planning as part of a small and friendly cross-functional team.
- Automated a cloud migration of the core platform that saved \$1350K per year.
- Took part in engineering hiring and career frameworks on a day-to-day basis alongside other routine responsibilities.
- Spearheaded an engineering career ladder, cutting time to market from 17 to 8 days.
- Took part in the long-term technology roadmap in line with the priorities agreed with senior stakeholders.

Senior Software Engineer — Kelpie Software (2005 – 2009)

- Monitored technical due diligence for partnerships as part of a small and friendly cross-functional team.
- Redesigned a microservices architecture that saved \$1260K per year.
- Reviewed engineering budgets and headcount planning with attention to accuracy, clarity and consistency.
- Supported quarterly technology updates for the board in line with the priorities agreed with senior stakeholders.
- Assisted with technical due diligence for partnerships in close collaboration with colleagues across several departments.
- Prepared engineering hiring and career frameworks in close collaboration with colleagues across several departments.
- Handled relationships with key technology vendors while following established internal guidelines and quality standards.
- Prepared quarterly technology updates for the board and kept relevant documentation up to date for the wider team.
- Organised the long-term technology roadmap for both internal teams and external partners.
- Supported relationships with key technology vendors with attention to accuracy, clarity and consistency.

- Collaborated on quarterly technology updates for the board and kept relevant documentation up to date for the wider team.
- Contributed to engineering budgets and headcount planning during periods of change and shifting business priorities.
- Monitored security and compliance programmes during periods of change and shifting business priorities.
- Prepared incident response and postmortem practices on a day-to-day basis alongside other routine responsibilities.
- Documented the long-term technology roadmap with attention to accuracy, clarity and consistency.
- Organised relationships with key technology vendors with attention to accuracy, clarity and consistency.
- Organised architecture reviews for major initiatives for both internal teams and external partners.
- Organised engineering budgets and headcount planning in line with the priorities agreed with senior stakeholders.
- Launched a zero-trust security programme now used by 8,115 customers.
- Took part in security and compliance programmes on a day-to-day basis alongside other routine responsibilities.
- Overhauled an internal developer platform within 9 months, generating \$1005K in new revenue.
- Prepared architecture reviews for major initiatives in close collaboration with colleagues across several departments.
- Organised security and compliance programmes in line with the priorities agreed with senior stakeholders.
- Led a team of 12 to deliver an internal developer platform 7 weeks ahead of schedule.
- Assisted with relationships with key technology vendors with attention to accuracy, clarity and consistency.
- Helped coordinate engineering budgets and headcount planning as part of a small and friendly cross-functional team.
- Looked after the platform and infrastructure organisation on a day-to-day basis alongside other routine responsibilities.

EDUCATION

MSc in Software Engineering — Halden Bay University (2004)

Professional development in leadership and strategy — University of Larkfield (2010)

INTERESTS

Chess and strategy games; Long-distance cycling; Reading contemporary fiction.
