

Piet Jarrow

Professor of Environmental Science | Kingsmere | piet.jarrow@example.com

PROFESSIONAL SUMMARY

Known among colleagues for clear communication and a calm, organised approach to everyday work. Adapts well to new tools and processes and enjoys sharing knowledge with others. Comfortable working both independently and as part of a team in fast-moving environments. Brings a steady work ethic, curiosity and a willingness to take on new responsibilities.

CORE SKILLS

research design, grant writing, postgraduate supervision, curriculum development, statistical analysis, peer review, public engagement, fieldwork coordination, academic leadership, interdisciplinary collaboration, laboratory management, scientific writing.

PROFESSIONAL EXPERIENCE

Professor of Environmental Science — Kelpie Software (2023 – Present)

- Prepared student pastoral support and kept relevant documentation up to date for the wider team.
- Organised laboratory safety and equipment management in line with the priorities agreed with senior stakeholders.
- Received the Innovation Award for delivering a field methods module.
- Automated a long-term river ecosystem monitoring study, cutting sample processing time from 17 to 2 days.
- Automated a citizen science water quality project within 4 months, generating \$210K in new revenue.
- Led a team of 18 to deliver a soil carbon research project 7 weeks ahead of schedule.
- Monitored peer review for academic journals using the tools and processes already in place within the organisation.
- Looked after outreach events for local schools and kept relevant documentation up to date for the wider team.
- Collaborated on peer review for academic journals while following established internal guidelines and quality standards.
- Helped coordinate peer review for academic journals and kept relevant documentation up to date for the wider team.
- Supported curriculum reviews and programme validation in line with the priorities agreed with senior stakeholders.
- Helped coordinate research seminars and reading groups as part of a small and friendly cross-functional team.
- Automated a long-term river ecosystem monitoring study, reducing laboratory costs by 41% within 8 months.
- Contributed to doctoral and master's supervision while following established internal guidelines and quality standards.
- Reviewed undergraduate and postgraduate modules in line with the priorities agreed with senior stakeholders.
- Took part in laboratory safety and equipment management on a day-to-day basis alongside other routine responsibilities.
- Introduced an open data repository for environmental samples that saved \$1035K per year.
- Streamlined an industry partnership for sensor development now used by 8,955 students.
- Helped coordinate laboratory safety and equipment management for both internal teams and external partners.
- Introduced a long-term river ecosystem monitoring study, reducing sample processing time by 12% within 8 months.

- Helped coordinate laboratory safety and equipment management during periods of change and shifting business priorities.
- Maintained collaborations with international research partners for both internal teams and external partners.
- Handled outreach events for local schools in line with the priorities agreed with senior stakeholders.
- Monitored curriculum reviews and programme validation on a day-to-day basis alongside other routine responsibilities.
- Looked after laboratory safety and equipment management while following established internal guidelines and quality standards.
- Launched a citizen science water quality project that saved \$735K per year.
- Contributed to departmental committee work in line with the priorities agreed with senior stakeholders.
- Prepared doctoral and master's supervision and kept relevant documentation up to date for the wider team.
- Reviewed research seminars and reading groups during periods of change and shifting business priorities.
- Prepared laboratory safety and equipment management as part of a small and friendly cross-functional team.
- Monitored collaborations with international research partners in close collaboration with colleagues across several departments.
- Led a team of 18 to deliver a soil carbon research project 7 weeks ahead of schedule.
- Built a field methods module, growing research income by 48% year on year.
- Maintained collaborations with international research partners on a day-to-day basis alongside other routine responsibilities.
- Received the Outstanding Contributor Award for delivering a new master's programme in climate adaptation.
- Received the Team of the Year Award for delivering an open data repository for environmental samples.
- Introduced a field methods module, cutting sample processing time from 12 to 7 days.
- Spearheaded a field methods module within 6 months, generating \$765K in new revenue.
- Rolled out a citizen science water quality project, cutting sample processing time from 20 to 2 days.
- Received the Regional Leadership Award for delivering a soil carbon research project.

Associate Professor — Redwing Health (2019 – 2023)

- Built a new master's programme in climate adaptation, increasing postgraduate enrolment by 10%.
- Delivered an industry partnership for sensor development within 5 months, generating \$240K in new revenue.
- Implemented an open data repository for environmental samples, cutting time to publication from 20 to 2 days.
- Looked after doctoral and master's supervision as part of a small and friendly cross-functional team.
- Organised laboratory safety and equipment management as part of a small and friendly cross-functional team.
- Prepared outreach events for local schools for both internal teams and external partners.
- Contributed to research seminars and reading groups with attention to accuracy, clarity and consistency.
- Documented peer review for academic journals in line with the priorities agreed with senior stakeholders.
- Monitored laboratory safety and equipment management on a day-to-day basis alongside other routine responsibilities.
- Helped coordinate peer review for academic journals for both internal teams and external partners.
- Organised research seminars and reading groups in close collaboration with colleagues across several departments.
- Looked after student pastoral support during periods of change and shifting business priorities.
- Introduced a field methods module that saved \$390K per year.

- Maintained laboratory safety and equipment management for both internal teams and external partners.
- Helped coordinate peer review for academic journals as part of a small and friendly cross-functional team.
- Introduced a long-term river ecosystem monitoring study within 9 months, generating \$915K in new revenue.
- Prepared doctoral and master's supervision during periods of change and shifting business priorities.
- Implemented a soil carbon research project, reducing time to publication by 36% within 10 months.
- Handled departmental committee work using the tools and processes already in place within the organisation.
- Took part in curriculum reviews and programme validation and kept relevant documentation up to date for the wider team.
- Collaborated on peer review for academic journals with attention to accuracy, clarity and consistency.
- Reviewed research seminars and reading groups while following established internal guidelines and quality standards.
- Monitored research seminars and reading groups with attention to accuracy, clarity and consistency.
- Took part in curriculum reviews and programme validation on a day-to-day basis alongside other routine responsibilities.
- Reviewed collaborations with international research partners during periods of change and shifting business priorities.
- Overhauled a long-term river ecosystem monitoring study, cutting sample processing time from 11 to 6 days.
- Introduced an interdisciplinary research centre that saved \$1200K per year.
- Delivered a soil carbon research project, increasing student satisfaction scores by 33%.
- Led a team of 15 to deliver a soil carbon research project 2 weeks ahead of schedule.
- Restructured a soil carbon research project, cutting student dropout rates from 12 to 9 days.
- Supported student pastoral support and kept relevant documentation up to date for the wider team.
- Overhauled an industry partnership for sensor development, increasing student satisfaction scores by 45%.
- Built a new master's programme in climate adaptation that saved \$615K per year.
- Looked after doctoral and master's supervision and kept relevant documentation up to date for the wider team.
- Helped coordinate student pastoral support while following established internal guidelines and quality standards.

Senior Lecturer — *Brightmoor Retail* (2017 – 2019)

- Took part in research seminars and reading groups and kept relevant documentation up to date for the wider team.
- Led a team of 12 to deliver an open data repository for environmental samples 3 weeks ahead of schedule.
- Reviewed departmental committee work and kept relevant documentation up to date for the wider team.
- Maintained research seminars and reading groups as part of a small and friendly cross-functional team.
- Organised curriculum reviews and programme validation in line with the priorities agreed with senior stakeholders.
- Prepared outreach events for local schools in close collaboration with colleagues across several departments.
- Monitored student pastoral support during periods of change and shifting business priorities.
- Spearheaded a field methods module that saved \$675K per year.
- Assisted with doctoral and master's supervision and kept relevant documentation up to date for the wider team.
- Reviewed laboratory safety and equipment management and kept relevant documentation up to date for the wider team.
- Reviewed peer review for academic journals as part of a small and friendly cross-functional team.

- Rolled out an open data repository for environmental samples, cutting laboratory costs from 21 to 3 days.
- Received the Innovation Award for delivering an industry partnership for sensor development.
- Implemented an interdisciplinary research centre, reducing laboratory costs by 42% within 5 months.
- Looked after doctoral and master's supervision in line with the priorities agreed with senior stakeholders.
- Handled research seminars and reading groups with attention to accuracy, clarity and consistency.
- Contributed to undergraduate and postgraduate modules and kept relevant documentation up to date for the wider team.
- Handled peer review for academic journals using the tools and processes already in place within the organisation.
- Overhauled an interdisciplinary research centre, reducing time to publication by 16% within 4 months.
- Launched a soil carbon research project that saved \$1275K per year.
- Helped coordinate doctoral and master's supervision in close collaboration with colleagues across several departments.
- Redesigned a new master's programme in climate adaptation, cutting time to publication from 25 to 8 days.
- Handled outreach events for local schools for both internal teams and external partners.
- Organised doctoral and master's supervision in line with the priorities agreed with senior stakeholders.
- Looked after collaborations with international research partners in line with the priorities agreed with senior stakeholders.
- Streamlined an interdisciplinary research centre now used by 5,910 publications.
- Organised outreach events for local schools during periods of change and shifting business priorities.
- Implemented a field methods module now used by 1,185 researchers.
- Prepared laboratory safety and equipment management using the tools and processes already in place within the organisation.
- Prepared curriculum reviews and programme validation using the tools and processes already in place within the organisation.
- Helped coordinate research seminars and reading groups in line with the priorities agreed with senior stakeholders.
- Overhauled an open data repository for environmental samples, growing student satisfaction scores by 26% year on year.
- Assisted with undergraduate and postgraduate modules for both internal teams and external partners.
- Delivered a citizen science water quality project now used by 8,160 researchers.

Lecturer — Fairlight Education (2015 – 2017)

- Maintained peer review for academic journals using the tools and processes already in place within the organisation.
- Documented student pastoral support on a day-to-day basis alongside other routine responsibilities.
- Organised research seminars and reading groups for both internal teams and external partners.
- Documented research seminars and reading groups with attention to accuracy, clarity and consistency.
- Reviewed peer review for academic journals in close collaboration with colleagues across several departments.
- Received the Regional Leadership Award for delivering a new master's programme in climate adaptation.
- Maintained curriculum reviews and programme validation while following established internal guidelines and quality standards.
- Helped coordinate laboratory safety and equipment management while following established internal guidelines and quality standards.
- Supported laboratory safety and equipment management during periods of change and shifting business priorities.
- Took part in laboratory safety and equipment management and kept relevant documentation up to date for the wider team.

- Redesigned an open data repository for environmental samples within 6 months, generating \$330K in new revenue.
- Introduced an open data repository for environmental samples now used by 1,005 doctoral candidates.
- Collaborated on doctoral and master's supervision using the tools and processes already in place within the organisation.
- Handled laboratory safety and equipment management as part of a small and friendly cross-functional team.
- Contributed to peer review for academic journals as part of a small and friendly cross-functional team.
- Automated a citizen science water quality project now used by 2,355 students.
- Introduced a new master's programme in climate adaptation, cutting laboratory costs from 20 to 5 days.
- Helped coordinate research seminars and reading groups for both internal teams and external partners.
- Collaborated on curriculum reviews and programme validation during periods of change and shifting business priorities.
- Supported research seminars and reading groups as part of a small and friendly cross-functional team.
- Took part in student pastoral support and kept relevant documentation up to date for the wider team.
- Received the Outstanding Contributor Award for delivering a new master's programme in climate adaptation.
- Contributed to laboratory safety and equipment management as part of a small and friendly cross-functional team.
- Took part in curriculum reviews and programme validation for both internal teams and external partners.
- Contributed to collaborations with international research partners while following established internal guidelines and quality standards.
- Maintained research seminars and reading groups for both internal teams and external partners.
- Spearheaded a field methods module, cutting time to publication from 20 to 5 days.
- Maintained collaborations with international research partners in close collaboration with colleagues across several departments.
- Took part in laboratory safety and equipment management during periods of change and shifting business priorities.

Postdoctoral Research Fellow — Tallow & Finch (2010 – 2015)

- Supported peer review for academic journals on a day-to-day basis alongside other routine responsibilities.
- Prepared student pastoral support on a day-to-day basis alongside other routine responsibilities.
- Prepared curriculum reviews and programme validation on a day-to-day basis alongside other routine responsibilities.
- Took part in curriculum reviews and programme validation as part of a small and friendly cross-functional team.
- Contributed to student pastoral support during periods of change and shifting business priorities.
- Maintained student pastoral support for both internal teams and external partners.
- Looked after departmental committee work during periods of change and shifting business priorities.
- Supported student pastoral support while following established internal guidelines and quality standards.
- Streamlined a new master's programme in climate adaptation that saved \$390K per year.
- Collaborated on curriculum reviews and programme validation and kept relevant documentation up to date for the wider team.
- Reviewed doctoral and master's supervision and kept relevant documentation up to date for the wider team.
- Handled collaborations with international research partners using the tools and processes already in place within the organisation.
- Helped coordinate curriculum reviews and programme validation while following established internal guidelines and quality standards.
- Assisted with outreach events for local schools and kept relevant documentation up to date for the wider team.

- Supported curriculum reviews and programme validation in close collaboration with colleagues across several departments.
- Monitored peer review for academic journals during periods of change and shifting business priorities.
- Reviewed departmental committee work with attention to accuracy, clarity and consistency.
- Maintained outreach events for local schools and kept relevant documentation up to date for the wider team.
- Assisted with peer review for academic journals while following established internal guidelines and quality standards.
- Looked after undergraduate and postgraduate modules while following established internal guidelines and quality standards.
- Documented outreach events for local schools using the tools and processes already in place within the organisation.
- Helped coordinate peer review for academic journals using the tools and processes already in place within the organisation.
- Supported doctoral and master's supervision using the tools and processes already in place within the organisation.

EDUCATION

PhD in Environmental Science — Halden Bay University (2010)

Professional development in leadership and strategy — University of Larkfield (2016)

INTERESTS

Learning languages; Reading contemporary fiction; Long-distance cycling.
