

Gideon Penhallow

Chief Technology Officer | Halden Bay | gideon.penhallow@example.com

PROFESSIONAL SUMMARY

Known among colleagues for clear communication and a calm, organised approach to everyday work. Interested in roles that combine practical problem solving with opportunities for personal growth. Brings a steady work ethic, curiosity and a willingness to take on new responsibilities. Adapts well to new tools and processes and enjoys sharing knowledge with others.

CORE SKILLS

technology strategy, cloud architecture, engineering leadership, security and compliance, platform scalability, budget ownership, hiring and team building, vendor negotiation, data platforms, board reporting, incident management, product partnership.

PROFESSIONAL EXPERIENCE

Chief Technology Officer — Fairlight Education (2022 – Present)

- Spearheaded a cloud migration of the core platform, reducing incident resolution time by 32% within 4 months.
- Contributed to security and compliance programmes using the tools and processes already in place within the organisation.
- Reviewed quarterly technology updates for the board as part of a small and friendly cross-functional team.
- Looked after security and compliance programmes as part of a small and friendly cross-functional team.
- Maintained relationships with key technology vendors in close collaboration with colleagues across several departments.
- Helped coordinate engineering budgets and headcount planning using the tools and processes already in place within the organisation.
- Looked after engineering hiring and career frameworks for both internal teams and external partners.
- Handled the platform and infrastructure organisation in close collaboration with colleagues across several departments.
- Supported engineering hiring and career frameworks while following established internal guidelines and quality standards.
- Received the Regional Leadership Award for delivering a machine learning recommendation service.
- Monitored technical due diligence for partnerships for both internal teams and external partners.
- Assisted with relationships with key technology vendors for both internal teams and external partners.
- Maintained relationships with key technology vendors with attention to accuracy, clarity and consistency.
- Documented quarterly technology updates for the board in close collaboration with colleagues across several departments.
- Contributed to quarterly technology updates for the board on a day-to-day basis alongside other routine responsibilities.
- Maintained incident response and postmortem practices using the tools and processes already in place within the organisation.
- Assisted with engineering hiring and career frameworks in close collaboration with colleagues across several departments.
- Helped coordinate relationships with key technology vendors as part of a small and friendly cross-functional team.
- Monitored the platform and infrastructure organisation and kept relevant documentation up to date for the wider team.
- Built a disaster recovery strategy, reducing incident resolution time by 11% within 8 months.
- Prepared architecture reviews for major initiatives with attention to accuracy, clarity and consistency.

- Contributed to relationships with key technology vendors while following established internal guidelines and quality standards.
- Looked after engineering budgets and headcount planning on a day-to-day basis alongside other routine responsibilities.
- Looked after architecture reviews for major initiatives as part of a small and friendly cross-functional team.
- Took part in technical due diligence for partnerships with attention to accuracy, clarity and consistency.
- Handled the long-term technology roadmap using the tools and processes already in place within the organisation.
- Collaborated on engineering hiring and career frameworks during periods of change and shifting business priorities.
- Maintained security and compliance programmes during periods of change and shifting business priorities.
- Supported relationships with key technology vendors in close collaboration with colleagues across several departments.
- Prepared quarterly technology updates for the board as part of a small and friendly cross-functional team.
- Prepared incident response and postmortem practices and kept relevant documentation up to date for the wider team.
- Documented security and compliance programmes as part of a small and friendly cross-functional team.
- Looked after the platform and infrastructure organisation for both internal teams and external partners.

VP of Engineering — Quarry Lane Digital (2018 – 2022)

- Handled security and compliance programmes during periods of change and shifting business priorities.
- Organised engineering budgets and headcount planning and kept relevant documentation up to date for the wider team.
- Prepared relationships with key technology vendors in close collaboration with colleagues across several departments.
- Organised quarterly technology updates for the board using the tools and processes already in place within the organisation.
- Maintained engineering hiring and career frameworks for both internal teams and external partners.
- Maintained technical due diligence for partnerships during periods of change and shifting business priorities.
- Reviewed technical due diligence for partnerships for both internal teams and external partners.
- Documented engineering hiring and career frameworks in line with the priorities agreed with senior stakeholders.
- Prepared architecture reviews for major initiatives for both internal teams and external partners.
- Reviewed architecture reviews for major initiatives while following established internal guidelines and quality standards.
- Took part in engineering budgets and headcount planning in line with the priorities agreed with senior stakeholders.
- Documented technical due diligence for partnerships in close collaboration with colleagues across several departments.
- Contributed to the long-term technology roadmap on a day-to-day basis alongside other routine responsibilities.
- Organised the long-term technology roadmap in line with the priorities agreed with senior stakeholders.
- Automated an internal developer platform, reducing infrastructure costs by 14% within 6 months.
- Supported incident response and postmortem practices while following established internal guidelines and quality standards.
- Contributed to the platform and infrastructure organisation and kept relevant documentation up to date for the wider team.
- Maintained architecture reviews for major initiatives in line with the priorities agreed with senior stakeholders.

- Prepared the platform and infrastructure organisation during periods of change and shifting business priorities.
- Reviewed technical due diligence for partnerships using the tools and processes already in place within the organisation.
- Reviewed security and compliance programmes using the tools and processes already in place within the organisation.
- Assisted with technical due diligence for partnerships for both internal teams and external partners.
- Collaborated on engineering budgets and headcount planning with attention to accuracy, clarity and consistency.
- Looked after the long-term technology roadmap on a day-to-day basis alongside other routine responsibilities.
- Supported relationships with key technology vendors with attention to accuracy, clarity and consistency.
- Reviewed the long-term technology roadmap in close collaboration with colleagues across several departments.
- Looked after quarterly technology updates for the board with attention to accuracy, clarity and consistency.
- Looked after engineering budgets and headcount planning in line with the priorities agreed with senior stakeholders.
- Looked after incident response and postmortem practices in line with the priorities agreed with senior stakeholders.
- Handled the long-term technology roadmap on a day-to-day basis alongside other routine responsibilities.
- Contributed to technical due diligence for partnerships with attention to accuracy, clarity and consistency.

Head of Platform Engineering — Ironbridge Logistics (2015 – 2018)

- Handled the long-term technology roadmap as part of a small and friendly cross-functional team.
- Monitored architecture reviews for major initiatives in close collaboration with colleagues across several departments.
- Organised the long-term technology roadmap with attention to accuracy, clarity and consistency.
- Documented relationships with key technology vendors in line with the priorities agreed with senior stakeholders.
- Supported technical due diligence for partnerships as part of a small and friendly cross-functional team.
- Automated a microservices architecture, growing deployment frequency by 13% year on year.
- Assisted with security and compliance programmes and kept relevant documentation up to date for the wider team.
- Organised engineering budgets and headcount planning as part of a small and friendly cross-functional team.
- Maintained security and compliance programmes and kept relevant documentation up to date for the wider team.
- Organised the long-term technology roadmap while following established internal guidelines and quality standards.
- Assisted with incident response and postmortem practices and kept relevant documentation up to date for the wider team.
- Organised relationships with key technology vendors with attention to accuracy, clarity and consistency.
- Assisted with technical due diligence for partnerships in close collaboration with colleagues across several departments.
- Supported technical due diligence for partnerships during periods of change and shifting business priorities.
- Assisted with quarterly technology updates for the board using the tools and processes already in place within the organisation.
- Delivered a machine learning recommendation service, increasing engineering retention by 43%.

- Handled relationships with key technology vendors on a day-to-day basis alongside other routine responsibilities.
- Built a machine learning recommendation service, reducing infrastructure costs by 52% within 2 months.
- Handled quarterly technology updates for the board with attention to accuracy, clarity and consistency.
- Assisted with the long-term technology roadmap with attention to accuracy, clarity and consistency.
- Assisted with relationships with key technology vendors with attention to accuracy, clarity and consistency.
- Handled relationships with key technology vendors during periods of change and shifting business priorities.
- Collaborated on incident response and postmortem practices using the tools and processes already in place within the organisation.
- Documented relationships with key technology vendors on a day-to-day basis alongside other routine responsibilities.
- Organised relationships with key technology vendors in close collaboration with colleagues across several departments.
- Handled the platform and infrastructure organisation in line with the priorities agreed with senior stakeholders.
- Looked after architecture reviews for major initiatives and kept relevant documentation up to date for the wider team.
- Monitored the platform and infrastructure organisation with attention to accuracy, clarity and consistency.
- Supported the long-term technology roadmap using the tools and processes already in place within the organisation.
- Documented the long-term technology roadmap and kept relevant documentation up to date for the wider team.
- Reviewed quarterly technology updates for the board for both internal teams and external partners.
- Helped coordinate incident response and postmortem practices on a day-to-day basis alongside other routine responsibilities.
- Handled architecture reviews for major initiatives with attention to accuracy, clarity and consistency.

Engineering Manager — Bluepeak Systems (2010 – 2015)

- Supported incident response and postmortem practices using the tools and processes already in place within the organisation.
- Collaborated on technical due diligence for partnerships for both internal teams and external partners.
- Helped coordinate relationships with key technology vendors and kept relevant documentation up to date for the wider team.
- Organised incident response and postmortem practices during periods of change and shifting business priorities.
- Assisted with relationships with key technology vendors in close collaboration with colleagues across several departments.
- Documented incident response and postmortem practices with attention to accuracy, clarity and consistency.
- Organised security and compliance programmes on a day-to-day basis alongside other routine responsibilities.
- Assisted with security and compliance programmes as part of a small and friendly cross-functional team.
- Supported relationships with key technology vendors in line with the priorities agreed with senior stakeholders.
- Reviewed architecture reviews for major initiatives using the tools and processes already in place within the organisation.
- Took part in architecture reviews for major initiatives on a day-to-day basis alongside other routine responsibilities.

- Helped coordinate engineering budgets and headcount planning with attention to accuracy, clarity and consistency.
- Helped coordinate engineering budgets and headcount planning in line with the priorities agreed with senior stakeholders.
- Reviewed security and compliance programmes as part of a small and friendly cross-functional team.
- Collaborated on relationships with key technology vendors in close collaboration with colleagues across several departments.
- Helped coordinate technical due diligence for partnerships and kept relevant documentation up to date for the wider team.
- Prepared engineering hiring and career frameworks and kept relevant documentation up to date for the wider team.
- Collaborated on relationships with key technology vendors in line with the priorities agreed with senior stakeholders.
- Prepared engineering hiring and career frameworks as part of a small and friendly cross-functional team.
- Took part in the platform and infrastructure organisation for both internal teams and external partners.
- Monitored quarterly technology updates for the board for both internal teams and external partners.
- Monitored the long-term technology roadmap in line with the priorities agreed with senior stakeholders.
- Took part in engineering hiring and career frameworks during periods of change and shifting business priorities.
- Organised security and compliance programmes while following established internal guidelines and quality standards.
- Helped coordinate engineering hiring and career frameworks during periods of change and shifting business priorities.
- Organised relationships with key technology vendors for both internal teams and external partners.
- Assisted with quarterly technology updates for the board on a day-to-day basis alongside other routine responsibilities.
- Assisted with quarterly technology updates for the board during periods of change and shifting business priorities.
- Helped coordinate architecture reviews for major initiatives in line with the priorities agreed with senior stakeholders.
- Looked after incident response and postmortem practices for both internal teams and external partners.

Senior Software Engineer — Silverfern Partners (2005 – 2010)

- Prepared architecture reviews for major initiatives while following established internal guidelines and quality standards.
- Monitored the platform and infrastructure organisation for both internal teams and external partners.
- Helped coordinate the platform and infrastructure organisation while following established internal guidelines and quality standards.
- Organised architecture reviews for major initiatives in close collaboration with colleagues across several departments.
- Supported engineering hiring and career frameworks for both internal teams and external partners.
- Took part in technical due diligence for partnerships and kept relevant documentation up to date for the wider team.
- Documented engineering hiring and career frameworks as part of a small and friendly cross-functional team.
- Looked after security and compliance programmes on a day-to-day basis alongside other routine responsibilities.
- Organised architecture reviews for major initiatives with attention to accuracy, clarity and consistency.
- Documented engineering budgets and headcount planning during periods of change and shifting business priorities.
- Documented architecture reviews for major initiatives for both internal teams and external partners.

- Assisted with architecture reviews for major initiatives and kept relevant documentation up to date for the wider team.
- Organised engineering budgets and headcount planning in line with the priorities agreed with senior stakeholders.
- Contributed to security and compliance programmes on a day-to-day basis alongside other routine responsibilities.
- Helped coordinate architecture reviews for major initiatives using the tools and processes already in place within the organisation.
- Took part in architecture reviews for major initiatives while following established internal guidelines and quality standards.
- Assisted with architecture reviews for major initiatives as part of a small and friendly cross-functional team.
- Took part in security and compliance programmes with attention to accuracy, clarity and consistency.
- Collaborated on the platform and infrastructure organisation while following established internal guidelines and quality standards.
- Redesigned an engineering career ladder, increasing deployment frequency by 36%.
- Documented the platform and infrastructure organisation during periods of change and shifting business priorities.
- Assisted with technical due diligence for partnerships in line with the priorities agreed with senior stakeholders.
- Took part in engineering budgets and headcount planning on a day-to-day basis alongside other routine responsibilities.
- Prepared technical due diligence for partnerships in line with the priorities agreed with senior stakeholders.
- Took part in engineering hiring and career frameworks using the tools and processes already in place within the organisation.
- Helped coordinate engineering hiring and career frameworks on a day-to-day basis alongside other routine responsibilities.
- Collaborated on the long-term technology roadmap for both internal teams and external partners.
- Reviewed engineering hiring and career frameworks as part of a small and friendly cross-functional team.
- Assisted with technical due diligence for partnerships and kept relevant documentation up to date for the wider team.
- Looked after the long-term technology roadmap with attention to accuracy, clarity and consistency.
- Prepared incident response and postmortem practices in close collaboration with colleagues across several departments.

EDUCATION

MSc in Software Engineering — Eastmoor Polytechnic (2004)

Professional development in leadership and strategy — Eastmoor Polytechnic (2010)

INTERESTS

Cooking and baking; Reading contemporary fiction; Learning languages.
