

Liora Coldridge

Chief Technology Officer | Port Averly | liora.coldridge@example.com

PROFESSIONAL SUMMARY

Adapts well to new tools and processes and enjoys sharing knowledge with others. Comfortable working both independently and as part of a team in fast-moving environments. Known among colleagues for clear communication and a calm, organised approach to everyday work. Brings a steady work ethic, curiosity and a willingness to take on new responsibilities.

CORE SKILLS

technology strategy, cloud architecture, engineering leadership, security and compliance, platform scalability, budget ownership, hiring and team building, vendor negotiation, data platforms, board reporting, incident management, product partnership.

PROFESSIONAL EXPERIENCE

Chief Technology Officer — Quarry Lane Digital (2021 – Present)

- Launched a microservices architecture within 9 months, generating \$390K in new revenue.
- Contributed to incident response and postmortem practices in line with the priorities agreed with senior stakeholders.
- Monitored architecture reviews for major initiatives with attention to accuracy, clarity and consistency.
- Looked after security and compliance programmes as part of a small and friendly cross-functional team.
- Launched a disaster recovery strategy, reducing incident resolution time by 34% within 10 months.
- Collaborated on the long-term technology roadmap during periods of change and shifting business priorities.
- Launched a cloud migration of the core platform within 7 months, generating \$1290K in new revenue.
- Rolled out a disaster recovery strategy, increasing deployment frequency by 28%.
- Maintained incident response and postmortem practices in close collaboration with colleagues across several departments.
- Prepared the platform and infrastructure organisation using the tools and processes already in place within the organisation.
- Helped coordinate technical due diligence for partnerships and kept relevant documentation up to date for the wider team.
- Led a team of 12 to deliver an engineering career ladder 4 weeks ahead of schedule.
- Supported engineering budgets and headcount planning as part of a small and friendly cross-functional team.
- Assisted with engineering budgets and headcount planning for both internal teams and external partners.
- Supported engineering hiring and career frameworks and kept relevant documentation up to date for the wider team.
- Reviewed engineering hiring and career frameworks with attention to accuracy, clarity and consistency.
- Overhauled a microservices architecture, reducing incident resolution time by 8% within 7 months.
- Contributed to engineering budgets and headcount planning while following established internal guidelines and quality standards.
- Handled the long-term technology roadmap on a day-to-day basis alongside other routine responsibilities.
- Helped coordinate quarterly technology updates for the board and kept relevant documentation up to date for the wider team.
- Overhauled a disaster recovery strategy now used by 8,775 engineers.
- Maintained security and compliance programmes in line with the priorities agreed with senior stakeholders.

- Prepared the long-term technology roadmap and kept relevant documentation up to date for the wider team.
- Collaborated on architecture reviews for major initiatives in line with the priorities agreed with senior stakeholders.
- Prepared engineering budgets and headcount planning in line with the priorities agreed with senior stakeholders.
- Monitored engineering hiring and career frameworks as part of a small and friendly cross-functional team.
- Led a team of 15 to deliver a disaster recovery strategy 4 weeks ahead of schedule.
- Supported engineering budgets and headcount planning using the tools and processes already in place within the organisation.
- Maintained security and compliance programmes on a day-to-day basis alongside other routine responsibilities.
- Supported the long-term technology roadmap while following established internal guidelines and quality standards.
- Launched a disaster recovery strategy that saved \$975K per year.
- Documented engineering budgets and headcount planning and kept relevant documentation up to date for the wider team.
- Contributed to security and compliance programmes in line with the priorities agreed with senior stakeholders.
- Helped coordinate security and compliance programmes as part of a small and friendly cross-functional team.
- Handled the long-term technology roadmap using the tools and processes already in place within the organisation.
- Assisted with incident response and postmortem practices on a day-to-day basis alongside other routine responsibilities.

VP of Engineering — Fairlight Education (2017 – 2021)

- Restructured a company-wide data platform now used by 5,490 customers.
- Launched a zero-trust security programme, cutting time to market from 11 to 6 days.
- Took part in architecture reviews for major initiatives during periods of change and shifting business priorities.
- Looked after relationships with key technology vendors in close collaboration with colleagues across several departments.
- Contributed to relationships with key technology vendors in line with the priorities agreed with senior stakeholders.
- Contributed to engineering budgets and headcount planning with attention to accuracy, clarity and consistency.
- Assisted with architecture reviews for major initiatives and kept relevant documentation up to date for the wider team.
- Introduced a company-wide data platform within 6 months, generating \$900K in new revenue.
- Helped coordinate technical due diligence for partnerships using the tools and processes already in place within the organisation.
- Helped coordinate engineering hiring and career frameworks with attention to accuracy, clarity and consistency.
- Introduced a company-wide data platform, reducing time to market by 43% within 2 months.
- Maintained quarterly technology updates for the board during periods of change and shifting business priorities.
- Built a cloud migration of the core platform, growing platform availability by 22% year on year.
- Reviewed security and compliance programmes during periods of change and shifting business priorities.
- Built a microservices architecture, increasing system throughput by 47%.

- Collaborated on the platform and infrastructure organisation during periods of change and shifting business priorities.
- Looked after architecture reviews for major initiatives using the tools and processes already in place within the organisation.
- Maintained the platform and infrastructure organisation with attention to accuracy, clarity and consistency.
- Helped coordinate engineering hiring and career frameworks in close collaboration with colleagues across several departments.
- Contributed to quarterly technology updates for the board on a day-to-day basis alongside other routine responsibilities.
- Contributed to technical due diligence for partnerships and kept relevant documentation up to date for the wider team.
- Assisted with the long-term technology roadmap for both internal teams and external partners.
- Introduced a disaster recovery strategy now used by 6,810 customers.
- Streamlined a zero-trust security programme, increasing platform availability by 65%.
- Organised engineering budgets and headcount planning and kept relevant documentation up to date for the wider team.
- Documented security and compliance programmes for both internal teams and external partners.
- Took part in security and compliance programmes in close collaboration with colleagues across several departments.
- Documented technical due diligence for partnerships and kept relevant documentation up to date for the wider team.
- Organised security and compliance programmes for both internal teams and external partners.
- Streamlined an internal developer platform, increasing system throughput by 45%.
- Took part in the platform and infrastructure organisation during periods of change and shifting business priorities.
- Handled architecture reviews for major initiatives and kept relevant documentation up to date for the wider team.
- Took part in engineering hiring and career frameworks using the tools and processes already in place within the organisation.
- Documented architecture reviews for major initiatives with attention to accuracy, clarity and consistency.
- Monitored quarterly technology updates for the board and kept relevant documentation up to date for the wider team.
- Looked after the platform and infrastructure organisation in line with the priorities agreed with senior stakeholders.

Head of Platform Engineering — Meridian Works (2013 – 2017)

- Monitored the long-term technology roadmap in line with the priorities agreed with senior stakeholders.
- Took part in the platform and infrastructure organisation while following established internal guidelines and quality standards.
- Collaborated on engineering budgets and headcount planning during periods of change and shifting business priorities.
- Handled security and compliance programmes while following established internal guidelines and quality standards.
- Received the Team of the Year Award for delivering a company-wide data platform.
- Organised technical due diligence for partnerships as part of a small and friendly cross-functional team.
- Looked after relationships with key technology vendors and kept relevant documentation up to date for the wider team.
- Led a team of 9 to deliver a company-wide data platform 3 weeks ahead of schedule.
- Supported the platform and infrastructure organisation as part of a small and friendly cross-functional team.
- Looked after engineering budgets and headcount planning in close collaboration with colleagues across several departments.

- Looked after incident response and postmortem practices while following established internal guidelines and quality standards.
- Assisted with engineering hiring and career frameworks as part of a small and friendly cross-functional team.
- Took part in incident response and postmortem practices on a day-to-day basis alongside other routine responsibilities.
- Supported the long-term technology roadmap in close collaboration with colleagues across several departments.
- Monitored the long-term technology roadmap on a day-to-day basis alongside other routine responsibilities.
- Collaborated on quarterly technology updates for the board and kept relevant documentation up to date for the wider team.
- Took part in engineering budgets and headcount planning as part of a small and friendly cross-functional team.
- Monitored security and compliance programmes during periods of change and shifting business priorities.
- Reviewed the long-term technology roadmap while following established internal guidelines and quality standards.
- Organised relationships with key technology vendors while following established internal guidelines and quality standards.
- Organised architecture reviews for major initiatives and kept relevant documentation up to date for the wider team.
- Took part in the long-term technology roadmap in close collaboration with colleagues across several departments.
- Took part in incident response and postmortem practices for both internal teams and external partners.
- Documented security and compliance programmes as part of a small and friendly cross-functional team.
- Monitored quarterly technology updates for the board in line with the priorities agreed with senior stakeholders.
- Documented the long-term technology roadmap on a day-to-day basis alongside other routine responsibilities.
- Organised quarterly technology updates for the board during periods of change and shifting business priorities.
- Organised the platform and infrastructure organisation and kept relevant documentation up to date for the wider team.
- Prepared relationships with key technology vendors during periods of change and shifting business priorities.

Engineering Manager — Brightmoor Retail (2011 – 2013)

- Reviewed engineering hiring and career frameworks as part of a small and friendly cross-functional team.
- Prepared engineering hiring and career frameworks using the tools and processes already in place within the organisation.
- Handled engineering budgets and headcount planning using the tools and processes already in place within the organisation.
- Maintained architecture reviews for major initiatives in line with the priorities agreed with senior stakeholders.
- Helped coordinate architecture reviews for major initiatives and kept relevant documentation up to date for the wider team.
- Reviewed relationships with key technology vendors and kept relevant documentation up to date for the wider team.
- Reviewed architecture reviews for major initiatives while following established internal guidelines and quality standards.

- Maintained incident response and postmortem practices on a day-to-day basis alongside other routine responsibilities.
- Spearheaded a cloud migration of the core platform that saved \$900K per year.
- Streamlined an internal developer platform that saved \$900K per year.
- Maintained engineering budgets and headcount planning for both internal teams and external partners.
- Organised the long-term technology roadmap in line with the priorities agreed with senior stakeholders.
- Assisted with the platform and infrastructure organisation during periods of change and shifting business priorities.
- Overhauled a company-wide data platform that saved \$1095K per year.
- Led a team of 18 to deliver a microservices architecture 8 weeks ahead of schedule.
- Documented the platform and infrastructure organisation using the tools and processes already in place within the organisation.
- Maintained architecture reviews for major initiatives during periods of change and shifting business priorities.
- Supported incident response and postmortem practices using the tools and processes already in place within the organisation.
- Helped coordinate engineering budgets and headcount planning in line with the priorities agreed with senior stakeholders.
- Reviewed relationships with key technology vendors using the tools and processes already in place within the organisation.
- Helped coordinate security and compliance programmes and kept relevant documentation up to date for the wider team.
- Collaborated on the platform and infrastructure organisation on a day-to-day basis alongside other routine responsibilities.
- Looked after the platform and infrastructure organisation using the tools and processes already in place within the organisation.
- Documented technical due diligence for partnerships with attention to accuracy, clarity and consistency.
- Took part in the platform and infrastructure organisation in close collaboration with colleagues across several departments.
- Prepared relationships with key technology vendors in close collaboration with colleagues across several departments.
- Supported relationships with key technology vendors using the tools and processes already in place within the organisation.
- Collaborated on security and compliance programmes during periods of change and shifting business priorities.
- Took part in the long-term technology roadmap in line with the priorities agreed with senior stakeholders.
- Organised relationships with key technology vendors as part of a small and friendly cross-functional team.

Senior Software Engineer — Kelpie Software (2006 – 2011)

- Prepared the platform and infrastructure organisation and kept relevant documentation up to date for the wider team.
- Contributed to the platform and infrastructure organisation in line with the priorities agreed with senior stakeholders.
- Handled quarterly technology updates for the board while following established internal guidelines and quality standards.
- Organised quarterly technology updates for the board with attention to accuracy, clarity and consistency.
- Took part in quarterly technology updates for the board using the tools and processes already in place within the organisation.
- Collaborated on architecture reviews for major initiatives during periods of change and shifting business priorities.

- Helped coordinate relationships with key technology vendors using the tools and processes already in place within the organisation.
- Took part in incident response and postmortem practices in close collaboration with colleagues across several departments.
- Documented the platform and infrastructure organisation during periods of change and shifting business priorities.
- Assisted with the long-term technology roadmap while following established internal guidelines and quality standards.
- Looked after engineering budgets and headcount planning in line with the priorities agreed with senior stakeholders.
- Documented technical due diligence for partnerships during periods of change and shifting business priorities.
- Monitored engineering hiring and career frameworks for both internal teams and external partners.
- Supported engineering budgets and headcount planning during periods of change and shifting business priorities.
- Organised technical due diligence for partnerships during periods of change and shifting business priorities.
- Monitored architecture reviews for major initiatives and kept relevant documentation up to date for the wider team.
- Helped coordinate engineering hiring and career frameworks and kept relevant documentation up to date for the wider team.
- Helped coordinate technical due diligence for partnerships in close collaboration with colleagues across several departments.
- Handled security and compliance programmes with attention to accuracy, clarity and consistency.
- Contributed to security and compliance programmes with attention to accuracy, clarity and consistency.
- Looked after quarterly technology updates for the board on a day-to-day basis alongside other routine responsibilities.
- Prepared quarterly technology updates for the board on a day-to-day basis alongside other routine responsibilities.
- Reviewed technical due diligence for partnerships and kept relevant documentation up to date for the wider team.
- Launched an internal developer platform that saved \$405K per year.
- Monitored engineering hiring and career frameworks in close collaboration with colleagues across several departments.
- Monitored engineering budgets and headcount planning in close collaboration with colleagues across several departments.
- Contributed to incident response and postmortem practices on a day-to-day basis alongside other routine responsibilities.

EDUCATION

MSc in Software Engineering — Eastmoor Polytechnic (2005)

Professional development in leadership and strategy — Westbrook College (2011)

INTERESTS

Community volunteering; Long-distance cycling; Hiking and outdoor photography.
