

# Fenna Quintrell

Professor of Environmental Science | Larkfield | fenna.quintrell@example.com

## PROFESSIONAL SUMMARY

Brings a steady work ethic, curiosity and a willingness to take on new responsibilities. Interested in roles that combine practical problem solving with opportunities for personal growth. Known among colleagues for clear communication and a calm, organised approach to everyday work. Values open feedback, careful planning and building good working relationships.

## CORE SKILLS

research design, grant writing, postgraduate supervision, curriculum development, statistical analysis, peer review, public engagement, fieldwork coordination, academic leadership, interdisciplinary collaboration, laboratory management, scientific writing.

## PROFESSIONAL EXPERIENCE

### *Professor of Environmental Science — Redwing Health (2022 – Present)*

- Organised doctoral and master's supervision as part of a small and friendly cross-functional team.
- Supported outreach events for local schools on a day-to-day basis alongside other routine responsibilities.
- Reviewed undergraduate and postgraduate modules for both internal teams and external partners.
- Received the Team of the Year Award for delivering an industry partnership for sensor development.
- Organised research seminars and reading groups using the tools and processes already in place within the organisation.
- Launched a soil carbon research project that saved \$510K per year.
- Handled collaborations with international research partners on a day-to-day basis alongside other routine responsibilities.
- Maintained departmental committee work for both internal teams and external partners.
- Monitored laboratory safety and equipment management as part of a small and friendly cross-functional team.
- Organised undergraduate and postgraduate modules on a day-to-day basis alongside other routine responsibilities.
- Collaborated on departmental committee work in line with the priorities agreed with senior stakeholders.
- Reviewed collaborations with international research partners for both internal teams and external partners.
- Redesigned an industry partnership for sensor development, increasing research income by 32%.
- Delivered a long-term river ecosystem monitoring study, increasing postgraduate enrolment by 61%.
- Looked after student pastoral support on a day-to-day basis alongside other routine responsibilities.
- Supported collaborations with international research partners on a day-to-day basis alongside other routine responsibilities.
- Took part in undergraduate and postgraduate modules using the tools and processes already in place within the organisation.
- Documented doctoral and master's supervision in close collaboration with colleagues across several departments.
- Looked after doctoral and master's supervision in line with the priorities agreed with senior stakeholders.
- Launched an open data repository for environmental samples, growing student satisfaction scores by 10% year on year.
- Received the Outstanding Contributor Award for delivering a new master's programme in climate adaptation.
- Helped coordinate curriculum reviews and programme validation while following established internal guidelines and quality standards.

- Maintained laboratory safety and equipment management as part of a small and friendly cross-functional team.
- Streamlined an industry partnership for sensor development, reducing time to publication by 52% within 10 months.
- Prepared doctoral and master's supervision while following established internal guidelines and quality standards.
- Rolled out an interdisciplinary research centre within 4 months, generating \$825K in new revenue.
- Built a citizen science water quality project, cutting time to publication from 24 to 9 days.
- Rolled out a citizen science water quality project, growing citation counts by 58% year on year.
- Maintained student pastoral support with attention to accuracy, clarity and consistency.
- Assisted with collaborations with international research partners in line with the priorities agreed with senior stakeholders.
- Looked after undergraduate and postgraduate modules during periods of change and shifting business priorities.
- Supported collaborations with international research partners and kept relevant documentation up to date for the wider team.
- Prepared curriculum reviews and programme validation while following established internal guidelines and quality standards.
- Assisted with peer review for academic journals during periods of change and shifting business priorities.
- Restructured a new master's programme in climate adaptation within 6 months, generating \$690K in new revenue.
- Documented undergraduate and postgraduate modules in close collaboration with colleagues across several departments.
- Assisted with collaborations with international research partners using the tools and processes already in place within the organisation.
- Supported outreach events for local schools in line with the priorities agreed with senior stakeholders.
- Assisted with outreach events for local schools while following established internal guidelines and quality standards.

***Associate Professor — Harbourline Group (2018 – 2022)***

- Assisted with collaborations with international research partners on a day-to-day basis alongside other routine responsibilities.
- Took part in undergraduate and postgraduate modules as part of a small and friendly cross-functional team.
- Helped coordinate doctoral and master's supervision on a day-to-day basis alongside other routine responsibilities.
- Took part in undergraduate and postgraduate modules on a day-to-day basis alongside other routine responsibilities.
- Organised undergraduate and postgraduate modules during periods of change and shifting business priorities.
- Assisted with doctoral and master's supervision for both internal teams and external partners.
- Prepared undergraduate and postgraduate modules while following established internal guidelines and quality standards.
- Maintained research seminars and reading groups using the tools and processes already in place within the organisation.
- Implemented a long-term river ecosystem monitoring study now used by 570 researchers.
- Maintained departmental committee work in close collaboration with colleagues across several departments.
- Streamlined an open data repository for environmental samples, reducing laboratory costs by 37% within 6 months.
- Collaborated on departmental committee work on a day-to-day basis alongside other routine responsibilities.

- Overhauled an interdisciplinary research centre, increasing student satisfaction scores by 8%.
- Contributed to student pastoral support as part of a small and friendly cross-functional team.
- Maintained undergraduate and postgraduate modules on a day-to-day basis alongside other routine responsibilities.
- Documented research seminars and reading groups on a day-to-day basis alongside other routine responsibilities.
- Maintained peer review for academic journals as part of a small and friendly cross-functional team.
- Redesigned a soil carbon research project, increasing student satisfaction scores by 27%.
- Handled laboratory safety and equipment management on a day-to-day basis alongside other routine responsibilities.
- Helped coordinate laboratory safety and equipment management for both internal teams and external partners.
- Prepared doctoral and master's supervision for both internal teams and external partners.
- Handled undergraduate and postgraduate modules in line with the priorities agreed with senior stakeholders.
- Documented laboratory safety and equipment management with attention to accuracy, clarity and consistency.
- Monitored doctoral and master's supervision while following established internal guidelines and quality standards.
- Took part in laboratory safety and equipment management as part of a small and friendly cross-functional team.
- Monitored undergraduate and postgraduate modules in line with the priorities agreed with senior stakeholders.
- Supported research seminars and reading groups for both internal teams and external partners.
- Automated a soil carbon research project within 7 months, generating \$1110K in new revenue.
- Led a team of 18 to deliver a new master's programme in climate adaptation 2 weeks ahead of schedule.
- Looked after outreach events for local schools during periods of change and shifting business priorities.
- Handled outreach events for local schools in close collaboration with colleagues across several departments.
- Documented doctoral and master's supervision as part of a small and friendly cross-functional team.
- Handled doctoral and master's supervision using the tools and processes already in place within the organisation.
- Monitored doctoral and master's supervision as part of a small and friendly cross-functional team.

#### ***Senior Lecturer — Quarry Lane Digital (2016 – 2018)***

- Maintained undergraduate and postgraduate modules in line with the priorities agreed with senior stakeholders.
- Contributed to doctoral and master's supervision with attention to accuracy, clarity and consistency.
- Implemented a long-term river ecosystem monitoring study within 8 months, generating \$1320K in new revenue.
- Reviewed student pastoral support with attention to accuracy, clarity and consistency.
- Maintained outreach events for local schools while following established internal guidelines and quality standards.
- Handled laboratory safety and equipment management in close collaboration with colleagues across several departments.
- Assisted with curriculum reviews and programme validation during periods of change and shifting business priorities.
- Looked after undergraduate and postgraduate modules with attention to accuracy, clarity and consistency.
- Collaborated on outreach events for local schools with attention to accuracy, clarity and consistency.
- Helped coordinate undergraduate and postgraduate modules in close collaboration with colleagues across several departments.

- Monitored collaborations with international research partners in close collaboration with colleagues across several departments.
- Maintained curriculum reviews and programme validation as part of a small and friendly cross-functional team.
- Organised peer review for academic journals using the tools and processes already in place within the organisation.
- Prepared collaborations with international research partners using the tools and processes already in place within the organisation.
- Reviewed doctoral and master's supervision while following established internal guidelines and quality standards.
- Monitored collaborations with international research partners using the tools and processes already in place within the organisation.
- Reviewed laboratory safety and equipment management on a day-to-day basis alongside other routine responsibilities.
- Handled undergraduate and postgraduate modules using the tools and processes already in place within the organisation.
- Monitored collaborations with international research partners with attention to accuracy, clarity and consistency.
- Handled laboratory safety and equipment management as part of a small and friendly cross-functional team.
- Took part in peer review for academic journals in line with the priorities agreed with senior stakeholders.
- Contributed to laboratory safety and equipment management for both internal teams and external partners.
- Contributed to departmental committee work in close collaboration with colleagues across several departments.
- Collaborated on collaborations with international research partners in line with the priorities agreed with senior stakeholders.
- Assisted with curriculum reviews and programme validation with attention to accuracy, clarity and consistency.
- Looked after departmental committee work during periods of change and shifting business priorities.
- Looked after curriculum reviews and programme validation using the tools and processes already in place within the organisation.
- Implemented an open data repository for environmental samples now used by 2,850 students.
- Handled curriculum reviews and programme validation while following established internal guidelines and quality standards.
- Monitored collaborations with international research partners in line with the priorities agreed with senior stakeholders.

***Lecturer — Tallow & Finch (2014 – 2016)***

- Prepared doctoral and master's supervision as part of a small and friendly cross-functional team.
- Launched a long-term river ecosystem monitoring study now used by 3,645 doctoral candidates.
- Collaborated on undergraduate and postgraduate modules on a day-to-day basis alongside other routine responsibilities.
- Reviewed collaborations with international research partners using the tools and processes already in place within the organisation.
- Documented laboratory safety and equipment management and kept relevant documentation up to date for the wider team.
- Prepared doctoral and master's supervision on a day-to-day basis alongside other routine responsibilities.
- Helped coordinate undergraduate and postgraduate modules and kept relevant documentation up to date for the wider team.
- Assisted with collaborations with international research partners in close collaboration with colleagues across several departments.

- Contributed to peer review for academic journals for both internal teams and external partners.
- Contributed to laboratory safety and equipment management in close collaboration with colleagues across several departments.
- Collaborated on student pastoral support during periods of change and shifting business priorities.
- Monitored research seminars and reading groups and kept relevant documentation up to date for the wider team.
- Collaborated on student pastoral support using the tools and processes already in place within the organisation.
- Assisted with doctoral and master's supervision using the tools and processes already in place within the organisation.
- Introduced a citizen science water quality project, cutting time to publication from 17 to 3 days.
- Handled outreach events for local schools on a day-to-day basis alongside other routine responsibilities.
- Looked after laboratory safety and equipment management with attention to accuracy, clarity and consistency.
- Monitored curriculum reviews and programme validation during periods of change and shifting business priorities.
- Prepared doctoral and master's supervision in line with the priorities agreed with senior stakeholders.
- Contributed to doctoral and master's supervision on a day-to-day basis alongside other routine responsibilities.
- Collaborated on outreach events for local schools during periods of change and shifting business priorities.
- Maintained doctoral and master's supervision during periods of change and shifting business priorities.
- Took part in outreach events for local schools while following established internal guidelines and quality standards.
- Handled doctoral and master's supervision as part of a small and friendly cross-functional team.
- Documented curriculum reviews and programme validation during periods of change and shifting business priorities.
- Organised doctoral and master's supervision with attention to accuracy, clarity and consistency.
- Maintained laboratory safety and equipment management in close collaboration with colleagues across several departments.
- Documented research seminars and reading groups during periods of change and shifting business priorities.
- Contributed to student pastoral support for both internal teams and external partners.
- Led a team of 18 to deliver an industry partnership for sensor development 2 weeks ahead of schedule.
- Prepared curriculum reviews and programme validation with attention to accuracy, clarity and consistency.

***Postdoctoral Research Fellow — Brightmoor Retail (2010 – 2014)***

- Reviewed student pastoral support in close collaboration with colleagues across several departments.
- Contributed to collaborations with international research partners with attention to accuracy, clarity and consistency.
- Handled curriculum reviews and programme validation during periods of change and shifting business priorities.
- Looked after doctoral and master's supervision in close collaboration with colleagues across several departments.
- Documented research seminars and reading groups in close collaboration with colleagues across several departments.
- Organised student pastoral support and kept relevant documentation up to date for the wider team.
- Handled departmental committee work in close collaboration with colleagues across several departments.
- Helped coordinate doctoral and master's supervision in close collaboration with colleagues across several departments.
- Rolled out a field methods module, increasing research income by 14%.

- Received the Regional Leadership Award for delivering an open data repository for environmental samples.
- Helped coordinate curriculum reviews and programme validation for both internal teams and external partners.
- Assisted with student pastoral support in close collaboration with colleagues across several departments.
- Contributed to departmental committee work in line with the priorities agreed with senior stakeholders.
- Reviewed laboratory safety and equipment management during periods of change and shifting business priorities.
- Handled collaborations with international research partners and kept relevant documentation up to date for the wider team.
- Looked after outreach events for local schools on a day-to-day basis alongside other routine responsibilities.
- Supported peer review for academic journals and kept relevant documentation up to date for the wider team.
- Documented student pastoral support on a day-to-day basis alongside other routine responsibilities.
- Led a team of 9 to deliver a long-term river ecosystem monitoring study 2 weeks ahead of schedule.
- Looked after outreach events for local schools in line with the priorities agreed with senior stakeholders.
- Assisted with doctoral and master's supervision in line with the priorities agreed with senior stakeholders.
- Prepared student pastoral support in close collaboration with colleagues across several departments.
- Monitored peer review for academic journals using the tools and processes already in place within the organisation.
- Handled outreach events for local schools as part of a small and friendly cross-functional team.
- Documented peer review for academic journals in close collaboration with colleagues across several departments.
- Organised undergraduate and postgraduate modules and kept relevant documentation up to date for the wider team.
- Collaborated on doctoral and master's supervision on a day-to-day basis alongside other routine responsibilities.
- Took part in undergraduate and postgraduate modules for both internal teams and external partners.
- Organised undergraduate and postgraduate modules for both internal teams and external partners.
- Documented peer review for academic journals using the tools and processes already in place within the organisation.

## **EDUCATION**

***PhD in Environmental Science — Eastmoor Polytechnic (2008)***

***Professional development in leadership and strategy — University of Larkfield (2014)***

## **INTERESTS**

Reading contemporary fiction; Learning languages; Chess and strategy games.
