Zelie Yarwood

Chief Technology Officer | Eastmoor | zelie.yarwood@example.com

PROFESSIONAL SUMMARY

Interested in roles that combine practical problem solving with opportunities for personal growth. Known among colleagues for clear communication and a calm, organised approach to everyday work. Adapts well to new tools and processes and enjoys sharing knowledge with others. Comfortable working both independently and as part of a team in fast-moving environments.

CORE SKILLS

technology strategy, cloud architecture, engineering leadership, security and compliance, platform scalability, budget ownership, hiring and team building, vendor negotiation, data platforms, board reporting, incident management, product partnership.

PROFESSIONAL EXPERIENCE

Chief Technology Officer — Fairlight Education (2024 – Present)

- Took part in relationships with key technology vendors using the tools and processes already in place within the organisation.
- Received the Team of the Year Award for delivering a company-wide data platform.
- Helped coordinate relationships with key technology vendors while following established internal guidelines and quality standards.
- Delivered a machine learning recommendation service, cutting security vulnerabilities from 13 to 2 days.
- Documented relationships with key technology vendors and kept relevant documentation up to date for the wider team.
- Collaborated on engineering hiring and career frameworks while following established internal guidelines and quality standards.
- Looked after incident response and postmortem practices while following established internal guidelines and quality standards.
- Documented relationships with key technology vendors for both internal teams and external partners.
- Redesigned a disaster recovery strategy that saved $1095K per year.
- Assisted with the long-term technology roadmap while following established internal guidelines and quality standards.
- Introduced a microservices architecture that saved $990K per year.
- Automated a company-wide data platform, growing platform availability by 19% year on year.
- Delivered a microservices architecture within 4 months, generating $300K in new revenue.
- Received the Regional Leadership Award for delivering a company-wide data platform.
- Received the Outstanding Contributor Award for delivering a machine learning recommendation service.
- Built an engineering career ladder within 6 months, generating $255K in new revenue.
- Took part in relationships with key technology vendors and kept relevant documentation up to date for the wider team.
- Restructured a company-wide data platform, growing platform availability by 41% year on year.
- Reviewed engineering hiring and career frameworks with attention to accuracy, clarity and consistency.
- Delivered a machine learning recommendation service, growing deployment frequency by 41% year on year.
- Redesigned an engineering career ladder that saved $255K per year.
- Maintained technical due diligence for partnerships for both internal teams and external partners.
- Led a team of 18 to deliver a disaster recovery strategy 3 weeks ahead of schedule.
- Organised incident response and postmortem practices while following established internal guidelines and quality standards.
- Introduced a cloud migration of the core platform now used by 3,135 users.

- Streamlined a disaster recovery strategy, reducing incident resolution time by 23% within 7 months.
- Reviewed engineering budgets and headcount planning for both internal teams and external partners.
- Documented engineering hiring and career frameworks while following established internal guidelines and quality standards.
- Rolled out a disaster recovery strategy that saved $855K per year.
- Assisted with quarterly technology updates for the board with attention to accuracy, clarity and consistency.
- Collaborated on the platform and infrastructure organisation while following established internal guidelines and quality standards.
- Built a machine learning recommendation service within 5 months, generating $510K in new revenue.
- Monitored the platform and infrastructure organisation in line with the priorities agreed with senior stakeholders.
- Collaborated on engineering budgets and headcount planning in line with the priorities agreed with senior stakeholders.
- Handled quarterly technology updates for the board on a day-to-day basis alongside other routine responsibilities.
- Organised quarterly technology updates for the board during periods of change and shifting business priorities.
- Delivered an internal developer platform, increasing platform availability by 60%.
- Received the Excellence Award for delivering a microservices architecture.
- Led a team of 18 to deliver an engineering career ladder 2 weeks ahead of schedule.

VP of Engineering — Saltmarsh Consulting (2020 – 2024)

- Implemented a microservices architecture that saved $750K per year.
- Rolled out a cloud migration of the core platform, reducing infrastructure costs by 65% within 9 months.
- Introduced a disaster recovery strategy that saved $600K per year.
- Rolled out a machine learning recommendation service that saved $420K per year.
- Took part in technical due diligence for partnerships for both internal teams and external partners.
- Monitored technical due diligence for partnerships in line with the priorities agreed with senior stakeholders.
- Took part in the platform and infrastructure organisation during periods of change and shifting business priorities.
- Restructured an engineering career ladder within 6 months, generating $390K in new revenue.
- Maintained architecture reviews for major initiatives using the tools and processes already in place within the organisation.
- Streamlined a machine learning recommendation service, growing deployment frequency by 27% year on year.
- Maintained quarterly technology updates for the board on a day-to-day basis alongside other routine responsibilities.
- Supported technical due diligence for partnerships for both internal teams and external partners.
- Received the Regional Leadership Award for delivering a company-wide data platform.
- Spearheaded a disaster recovery strategy, reducing security vulnerabilities by 43% within 3 months.
- Supported relationships with key technology vendors in close collaboration with colleagues across several departments.
- Handled quarterly technology updates for the board using the tools and processes already in place within the organisation.
- Helped coordinate technical due diligence for partnerships in line with the priorities agreed with senior stakeholders.
- Automated a zero-trust security programme, increasing engineering retention by 31%.
- Delivered a cloud migration of the core platform, growing deployment frequency by 40% year on year.
- Collaborated on quarterly technology updates for the board while following established internal guidelines and quality standards.
- Automated a cloud migration of the core platform within 4 months, generating $435K in new revenue.

- Restructured a machine learning recommendation service that saved $690K per year.
- Collaborated on security and compliance programmes in close collaboration with colleagues across several departments.
- Collaborated on relationships with key technology vendors while following established internal guidelines and quality standards.
- Maintained incident response and postmortem practices while following established internal guidelines and quality standards.
- Launched a microservices architecture, growing platform availability by 41% year on year.
- Took part in technical due diligence for partnerships while following established internal guidelines and quality standards.
- Rolled out a microservices architecture now used by 4,815 engineers.
- Contributed to relationships with key technology vendors in close collaboration with colleagues across several departments.
- Launched an engineering career ladder now used by 4,905 users.
- Handled security and compliance programmes as part of a small and friendly cross-functional team.
- Supported architecture reviews for major initiatives and kept relevant documentation up to date for the wider team.
- Organised engineering hiring and career frameworks for both internal teams and external partners.
- Organised engineering hiring and career frameworks and kept relevant documentation up to date for the wider team.
- Automated a microservices architecture now used by 8,055 customers.

Head of Platform Engineering — Lumen Street Media (2017 – 2020)

- Handled security and compliance programmes in close collaboration with colleagues across several departments.
- Helped coordinate security and compliance programmes during periods of change and shifting business priorities.
- Looked after quarterly technology updates for the board while following established internal guidelines and quality standards.
- Monitored incident response and postmortem practices as part of a small and friendly cross-functional team.
- Helped coordinate security and compliance programmes for both internal teams and external partners.
- Spearheaded a zero-trust security programme that saved $840K per year.
- Redesigned a microservices architecture, reducing incident resolution time by 63% within 9 months.
- Led a team of 15 to deliver a zero-trust security programme 2 weeks ahead of schedule.
- Collaborated on security and compliance programmes using the tools and processes already in place within the organisation.
- Documented incident response and postmortem practices as part of a small and friendly cross-functional team.
- Prepared architecture reviews for major initiatives during periods of change and shifting business priorities.
- Took part in engineering hiring and career frameworks while following established internal guidelines and quality standards.
- Handled the platform and infrastructure organisation in close collaboration with colleagues across several departments.
- Prepared quarterly technology updates for the board with attention to accuracy, clarity and consistency.
- Handled security and compliance programmes on a day-to-day basis alongside other routine responsibilities.
- Built a cloud migration of the core platform within 3 months, generating $915K in new revenue.
- Supported the platform and infrastructure organisation during periods of change and shifting business priorities.
- Restructured a machine learning recommendation service, increasing deployment frequency by 28%.
- Redesigned a cloud migration of the core platform within 7 months, generating $1185K in new revenue.

- Overhauled a company-wide data platform now used by 3,675 customers.
- Collaborated on relationships with key technology vendors as part of a small and friendly cross-functional team.
- Prepared security and compliance programmes using the tools and processes already in place within the organisation.
- Supported incident response and postmortem practices while following established internal guidelines and quality standards.
- Monitored the long-term technology roadmap as part of a small and friendly cross-functional team.
- Built an engineering career ladder within 9 months, generating $675K in new revenue.
- Introduced a company-wide data platform, increasing deployment frequency by 64%.
- Reviewed architecture reviews for major initiatives while following established internal guidelines and quality standards.

Engineering Manager — Bluepeak Systems (2013 – 2017)

- Introduced a machine learning recommendation service, increasing engineering retention by 60%.
- Documented incident response and postmortem practices for both internal teams and external partners.
- Documented architecture reviews for major initiatives on a day-to-day basis alongside other routine responsibilities.
- Overhauled a machine learning recommendation service, cutting infrastructure costs from 13 to 3 days.
- Collaborated on technical due diligence for partnerships on a day-to-day basis alongside other routine responsibilities.
- Assisted with technical due diligence for partnerships while following established internal guidelines and quality standards.
- Looked after technical due diligence for partnerships using the tools and processes already in place within the organisation.
- Received the Regional Leadership Award for delivering a zero-trust security programme.
- Prepared engineering budgets and headcount planning on a day-to-day basis alongside other routine responsibilities.
- Led a team of 12 to deliver a zero-trust security programme 6 weeks ahead of schedule.
- Looked after engineering hiring and career frameworks on a day-to-day basis alongside other routine responsibilities.
- Maintained engineering hiring and career frameworks as part of a small and friendly cross-functional team.
- Delivered a zero-trust security programme, cutting time to market from 12 to 6 days.
- Contributed to the platform and infrastructure organisation as part of a small and friendly cross-functional team.
- Monitored relationships with key technology vendors with attention to accuracy, clarity and consistency.
- Documented technical due diligence for partnerships and kept relevant documentation up to date for the wider team.
- Prepared relationships with key technology vendors on a day-to-day basis alongside other routine responsibilities.
- Maintained the platform and infrastructure organisation with attention to accuracy, clarity and consistency.
- Rolled out a microservices architecture that saved $1320K per year.
- Received the Team of the Year Award for delivering a zero-trust security programme.
- Maintained the long-term technology roadmap on a day-to-day basis alongside other routine responsibilities.
- Implemented a machine learning recommendation service, growing deployment frequency by 36% year on year.
- Supported technical due diligence for partnerships on a day-to-day basis alongside other routine responsibilities.
- Took part in the platform and infrastructure organisation in line with the priorities agreed with senior stakeholders.

- Contributed to technical due diligence for partnerships and kept relevant documentation up to date for the wider team.
- Helped coordinate the platform and infrastructure organisation in line with the priorities agreed with senior stakeholders.

Senior Software Engineer — Oakhaven Services (2009 – 2013)

- Streamlined an engineering career ladder, cutting infrastructure costs from 25 to 8 days.
- Helped coordinate quarterly technology updates for the board with attention to accuracy, clarity and consistency.
- Organised the platform and infrastructure organisation in close collaboration with colleagues across several departments.
- Monitored security and compliance programmes while following established internal guidelines and quality standards.
- Prepared the long-term technology roadmap while following established internal guidelines and quality standards.
- Helped coordinate architecture reviews for major initiatives while following established internal guidelines and quality standards.
- Reviewed relationships with key technology vendors during periods of change and shifting business priorities.
- Documented technical due diligence for partnerships in line with the priorities agreed with senior stakeholders.
- Monitored architecture reviews for major initiatives using the tools and processes already in place within the organisation.
- Monitored the platform and infrastructure organisation on a day-to-day basis alongside other routine responsibilities.
- Documented incident response and postmortem practices while following established internal guidelines and quality standards.
- Helped coordinate security and compliance programmes in line with the priorities agreed with senior stakeholders.
- Led a team of 18 to deliver a company-wide data platform 5 weeks ahead of schedule.
- Looked after technical due diligence for partnerships in close collaboration with colleagues across several departments.
- Organised the platform and infrastructure organisation in line with the priorities agreed with senior stakeholders.
- Took part in the long-term technology roadmap using the tools and processes already in place within the organisation.
- Prepared the platform and infrastructure organisation and kept relevant documentation up to date for the wider team.
- Handled the platform and infrastructure organisation during periods of change and shifting business priorities.
- Collaborated on engineering budgets and headcount planning as part of a small and friendly cross-functional team.
- Maintained architecture reviews for major initiatives for both internal teams and external partners.

EDUCATION

MSc in Software Engineering — Eastmoor Polytechnic (2009)

Professional development in leadership and strategy — Eastmoor Polytechnic (2015)

INTERESTS

Learning languages; Cooking and baking; Reading contemporary fiction.
